Pitch Deck

# Dark Galaxies

On the WAX blockchain with an  
Atomic Assets structure

# Dark Galaxies

---

Hey Dark Galaxies community, welcome to the Dark Galaxies universe where you can experience the best gaming on the WAX blockchain space, and depending on your gaming abilities, earn income at the same time.

Our game has been developed by experts in the field throughout the world. Utilising their expertise we can bring you not only a world class game where you can play to earn, but also understand the universe of Dark Galaxies through a total of 7 science fiction novels, as well as, your own set of poker chips to keep your game top of mind.

## WHAT DRIVES US

The blockchain gaming industry is evolving very swiftly, as has the use of NFTs. This is well known in the gaming world, and the enormous growth in development based on blockchain and the extraordinary features of this technology provides endless possibilities right now and long into the future.

Dark Galaxies has built an integrated digital platform based on card decks that have multiple attributes. Rarity, Creature Race, Character or Artifact, Mana, Attack and Defence values, Abilities. These unique card characteristics are the way Dark Galaxies has built a blockchain based gaming world which has a future secured through the use of Non Fungible Tokens (NFTs).

# Dark Galaxies

---

## OUR TEAM

Years of experience building digital games integrated with blockchain specialists has seen this like minded group build themselves into a powerful team which has developed an ever more powerful gaming platform. Early adoption of the concept by first mover deck acquirers has contributed to the creation of an NFT ecosystem in the blockchain space that will drive sustainable long term value to players and investors alike.

Our Team philosophy has been to build and deliver a comprehensive ecosystem which includes the game, novels, chips and NFTs to create a liquid NFT marketplace as well as a significant Dark Galaxies community.

# Dark Galaxies

---

## OUR VISION

Dark Galaxies believes that now blockchain is well and truly here, and the use of NFTs becoming more and more common every day, that the play to earn market will grow at least at the same pace.

We see a future where blockchain applied financial markets will reach even further, bringing pay-to-earn gaming technologies to the very corners of the world.

## WHAT IS THE TECHNOLOGY BEHIND DARK GALAXIES

DTX and DTF are the tokens created on the EOS blockchain, they will be tradeable by anyone and initially listed on a decentralised exchange in the following pairs

- WAX:DTX
- DTX:DTF

All blockchain assets will reside on the WAX blockchain in the Atomic Assets structure.

Dark Galaxies is a browser based game in WebGL format built in Unity for the trading card game and ReactJS for the mining game.

# Dark Galaxies

---

## GAME PLAY AND FEATURES

The game will be based on the effective utilisation of strategies to skilfully play the cards in the players deck to the disadvantage of a variety of opponents.

- Single Player
- Multi-Player PVP
- Land Battles
- Planet Battles
- Mining for rewards

# Dark Galaxies

## BATTLE

In the galaxy a player has the chance to come up against another player, or alternatively, another player's cards on the board.

Let the battle commence.

Alongside mining, this is the cauldron to play and earn.

# Dark Galaxies

---

## PLAYING TO EARN

A planet owner can determine the rewards and tax rates for their entire planet, what they will receive, as well as the attackers, defenders and miners.

But play carefully, balance is the key.

Mining on planets is how players earn the token DTF. Each of the 2400 planets can accommodate up to 10 miners per planet.

# Dark Galaxies

---

## ATTACK AND DEFENCE

Attack points that lie in a card refer to the amount of damage that card can deal...

Defence points is the amount of life that's left in a character card. Don't get to zero or a black hole awaits.

# Dark Galaxies

## MINING ATTRIBUTES

Each mining tool has a Power and Cooldown factor to determine how much reward it will yield.

Each planet has a Difficulty and Cooldown which aids in the reward calculation to determine a players mining reward.

# Dark Galaxies

## THE RACES

The Guq'uk

The Dread

The Kulze

Humans

Order of the Luma

Jujari

## WHAT OTHERS SAY

The update of whitepaper really makes my feel good about this project, even better than the last update! The introduction about mining is awesome update. I really think team will make the best for game for WAX and their community – Shoty - Player

The graphics are very nice, and I like the idea of democracy and voting on every change, and also the site is easy and simple, and the game is not complicated like other existing card games – XxX - Player

We believe that Dark Galaxies have the capability to scale rapidly and deliver any objective that they set in their sights. We're proud to have them as an official partner and I have no doubt that Dark Galaxies will be a dominant player in the NFT P2E Ecosystem and looking forward to see what the future holds – Malaki - SolCraft

I, CriptoGary with my Spanish-speaking NFTS and Criptos YouTube channel, am proud to have worked for the Dark Galaxies project, a project that for me and for their hard work seems to have great potential, I hope to continue collaborating with them in future videos – Cripto Gary – Influencer/Promoter
